

**ARTS**  
EXTENDING YOUR SUCCESS

## **REDUCE YOUR PROCESS COSTS BY AT LEAST 20% WITH ARTS.\***

**As a supplier-independent service provider, we take over your Tool Management within the scope of Business Process Outsourcing.**

ARTS offers its international high-tech customers from the automotive, railway, aerospace, engineering, and manufacturing sectors as well as the IT and communications technology, security and defence fields an innovative and supplier-independent service concept within the field of Tool Management.

**Free process analysis and process consulting. 100% clarity – 100% free.**

During the analysis of your tool management process, we consistently apply lean management principles to optimise processes as well as process costs. This results in a lower variety of tools and a reduced inventory while maintaining steady tool availability.

\* The performance promise assumes a Tool Management process volume of at least €1 million per year.

# SUPPLIER-INDEPENDENT BUSINESS PROCESS OUTSOURCING FOR YOUR TOOL MANAGEMENT

Within the scope of Business Process Outsourcing, we take over on location the following activities for all of your essential tools such as personal tools, standard tools, testing tools and special tools:

## Acquisition of tools

- needs assessment
- disposition
- delivery tracking and acceptance
- storage &
- recycling of tools

## Tool crib

- the management of the operating material of the tool crib
- the handing out, the return and the processing of tools with the help of electronic resource management systems
- the introduction of a tool management system

## Gauge Management

- the monitoring of expiry dates
- recalibration
- the replacement of tools

## Tool Lifecycle Management

- functional and quality tests
- execution of administrative procedures in the case of special tools, e.g. non-routine practices
- repairs
- recycling
- quarterly and/or annual stocktaking
