

# SOFTWARE DEVELOPER (M/F/X)

ARTS

Behind technical services and innovative ideas there are always people with vision. People who, with their knowledge and drive make technical success possible in the first place – people like you. As experts in HR services, ARTS assists high-tech companies worldwide within the scope of their personnel placement, deploying the best minds to create more effective and efficient processes.

Do you enjoy project development in an international environment? Then help our well-known customer in **Hamburg** as a **Software Developer** to faster, better and more efficient products. In your future job you will be responsible for the development of individual software components in Java for connecting biometric services and SDKs to customer systems in the BackEnd Projects area.

## Task description

- Integration of external systems
- Participation in fullstack project teams and assumption of work on complete systems
- Accompanying the expansion of the portfolio of system solutions from the first customer inquiry to the handover to the customer
- Preparation of the systems for deployment in the customer's target environment
- Automation of load and integration tests using Docker and Jenkins

## Requirements

- Completed vocational training or studies in the field of IT
- Professional experience in programming with Java as well as Spring Boot and Spring Dat
- Good knowledge of Linux and Unix systems and shell programming
- Experience with operational tasks (e.g. deployment or monitoring) as well as with Docker and Kubernetes is an advantage
- Fluent in German and English, other foreign languages advantageous
- Willingness to take occasional business trips

## Our Services

- Demanding projects in an international environment
- Dealing with new technologies in the field of biometrics
- An interesting, diversified and challenging job in a highly motivated team
- Flexible working hours
- Performance-related remuneration
- HVV-ProfiCard, Sodexo voucher
